

## **Together to set up a factory in Uganda for the company's medical cannabis farm produce**

**The plant, which will be set up according to the GMP standard, will manufacture products for customers in Germany and Canada, independent of third parties, and saving costs**

Ashkelon, January 27 2019 - Together (TASE: TGDR), which specializes in cultivating and producing medical cannabis, has reported that it is working to set up a factory for drying and extracting medical cannabis, close to the company's farm in Uganda, in coordination with the relevant regulatory bodies in Uganda. Setting up the factory in accordance with the G.M.P. standard, will be under the control of Together, so that the company will be able to operate in the near future to sell its future products in Canada and Germany and will not be dependent on other factories, and will also save on processing, conveyancing and security costs.

At the same time as setting up the factory, the company is working towards receipt of the G.M.P. standard, according to the Canadian and European standard, and this is being accomplished with the assistance of GSAP, one of the largest and leading companies in Israel for planning pharmaceutical factories.

In addition, with the start of planting in the company's Uganda farm, the company is pleased to announce that it is currently working to certify its Uganda farm with the C.U.M.C. standard (as G.A.P.) and is undertaking this with assistance of representatives of the Peterson and Control Union.

According to a notification by the Tel Aviv Stock Exchange (TASE), the company is expected to enter the "Tamar" share reserve, which serves as a

base prior to entering the TASE indices. The reserve encompasses a list of all the shares that meet the basic threshold for being included in the TASE investment indices and includes more than 300 shares traded on the TASE. This reserve serves as a base for the TASE's growth indices such as the TA AllShare, TA – Growth and sector indices.

Together CEO Nissim Bracha said: "Setting up the factory in Uganda ensures that the production endeavor in that country will under our control and supervision, in order to manufacture medical cannabis products, which meet the standards required by our customers in target markets and without being dependent on anybody. In addition, we will be able to save on third party production costs and we can make further savings by building the factory on the farmland itself."

### **About Together and Globus Pharma**

Together (TASE: TGTR) operates in the medical cannabis sector through its subsidiary Globus Pharma, which is currently setting up an advanced agricultural and technological infrastructure for cultivating, producing and marketing medical cannabis in Israel and abroad. The company has marketing and distribution agreements with leading companies in the medical cannabis sector in Germany and Canada amounting to an overall 80 tons of produce annually. Together Pharma has a team of experts in cultivating cannabis with more than 20 years of knowhow and practical experience in cultivating medical cannabis. The company is in advanced stages of receiving marketing approval in Germany and the entire European market, including submitting a request to receive a European permit for exporting medical cannabis products and receiving a license to distribute them throughout Europe.
